

DOUBLE END STUD BOLT™

FOR BIN STIFFENERS

WHAT IT DOES

The **Sukup Double End Stud Bolt™** is for use on laminated bin sheets and solves the potential problem of water weeping behind the stiffeners and into the bin causing spoiled grain. The patented design features a rubber-backed steel washer in the middle of the bolt that is set between the stiffener and sidewall sheets. This provides a tight seal directly to the outer sidewall sheet behind the stiffener, eliminating water infiltration between the sheets and into the grain.
